Re: Response to Selected NODs for Chemical Processors, Inc.  
Pier 91 Facility Part B Permit Application

Dear Ms. Gilder:

We have received the most recent NOD for the Chemical Processors, Inc. Pier 91 Facility Part B Permit Application, and will be responding to a majority of the NODs within the 30-day timeframe as requested. Responses to the remaining NODs will be submitted within 60 days, as requested.

As discussed with you in a recent phone conversation, we are requesting an extension from 30 to 60 days for responses to 2 NODs: numbers 29 and 31. Like the 3 other NODs you included in the 60-day response timeframe, responses to these NODs will also require revision of engineering diagrams prepared by outside consultants. Typically, revisions of this type take more than 30 days from the time a request for revision is received until final revised drawings are approved, reduced, and printed for inclusion in the permit applications.

Please let us know by Monday, July 8, if we may extend the deadline for response to these 2 NODs. If you approve, responses to these NODs will be included with the remaining responses scheduled for submittal by August 9, 1991.

We appreciate your consideration of this request, and look forward to hearing from you soon. Please contact me at 223-0500 if you have any questions.

Sincerely,

Catherine L. Buller  
Environmental Programs Manager
